

Winter School on Lang and Vojta's conjectures

Conference in CIRM, Marseille, France

from March 3rd to 7th 2014

$$\max(|a|, |b|, |c|) \leq \mathbf{K}_\varepsilon (\text{rad}(abc))^{1+\varepsilon}$$

MINI-COURSES

Pietro Corvaja (University of Udine)

La conjecture de Vojta sur la dégénérescence des points entiers

Carlo Gasbarri (IRMA, Strasbourg)

Arithmetic of algebraic points on varieties over function fields

Philipp Habegger (University of Frankfurt)

Unlikely intersections in diophantine geometry

Gaël Rémond (University of Bordeaux)

Points rationnels des sous-variétés des variétés abéliennes

Paul Vojta

This conference is part of
the 2014 Chaire Jean Morlet Program on Arithmetic

Serge Lang

ORGANIZERS

Michel Laurent (IML, Marseille), Guillaume Rond (IML, Marseille), Erwan Rousseau (LATP, Marseille)

LABORATOIRE D'EXCELLENCE

LABEX ARCHIMÈDE
